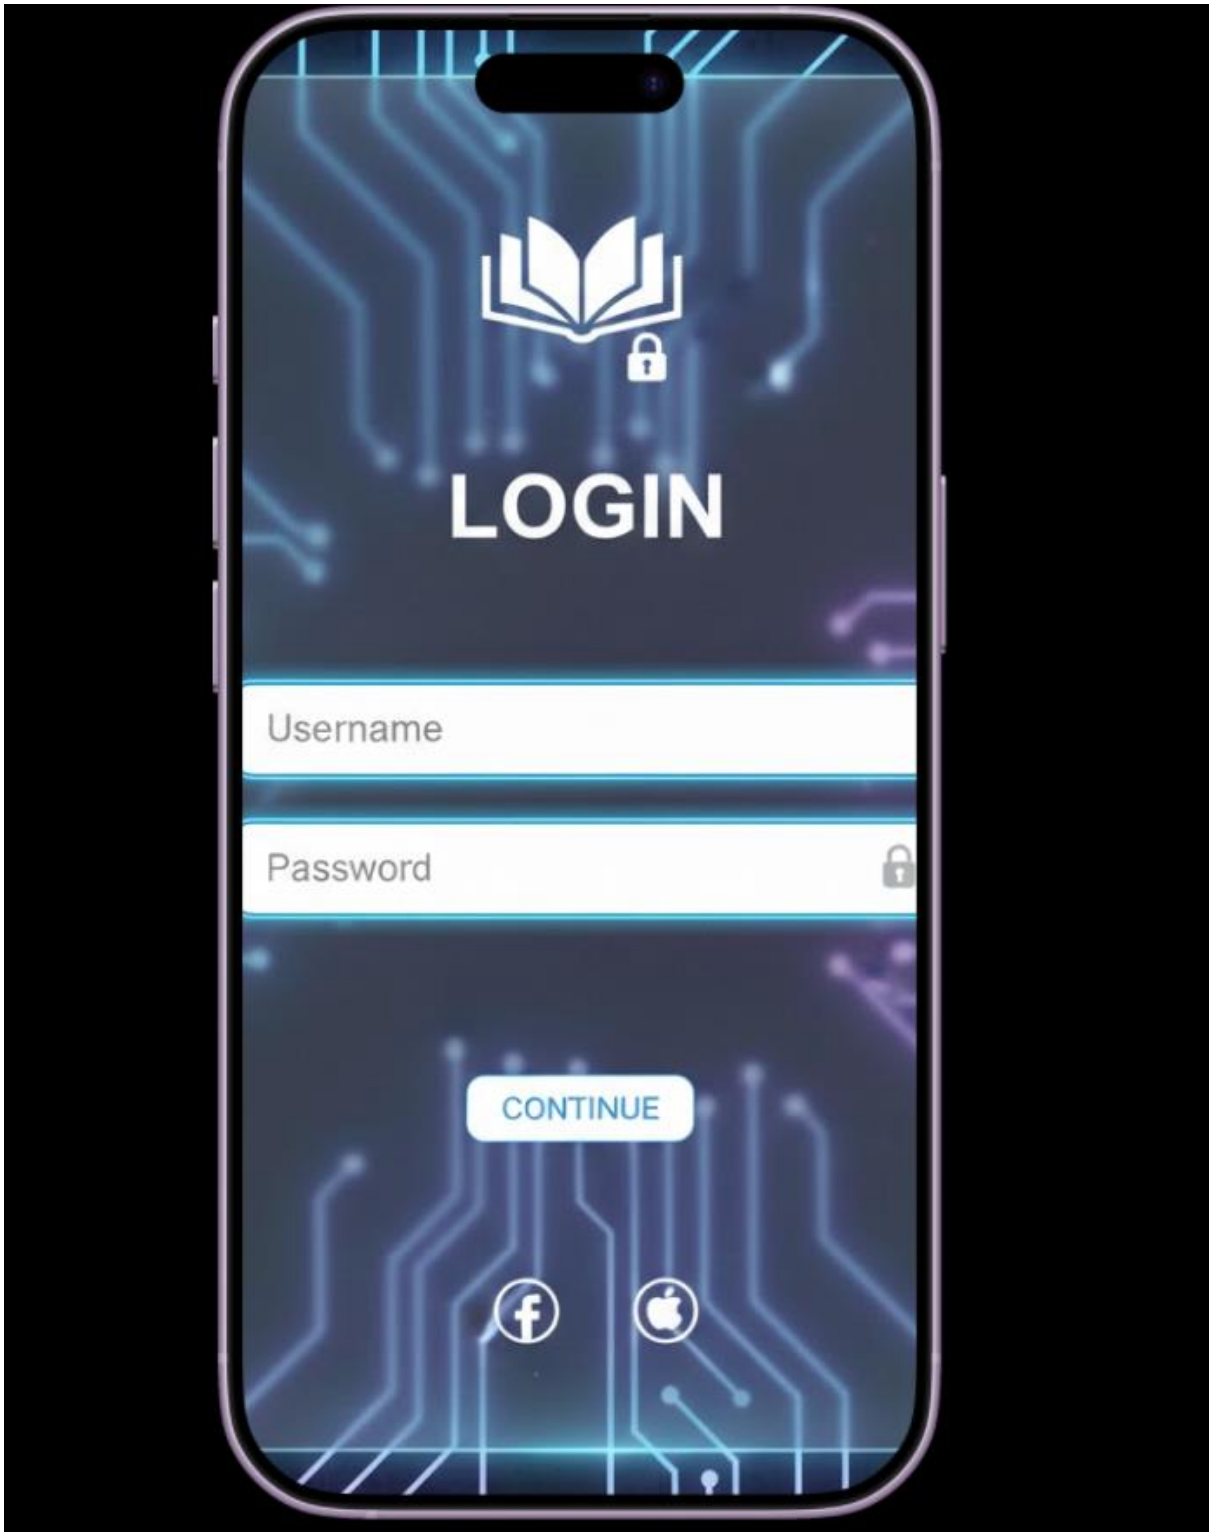
UID EX 4

I developed a prototype using Proto.io to incorporate both familiar and novel navigation elements, aiming to evaluate usability among diverse user groups. The prototype consists of three key screens: the Login Page, Home Page, and Profile Page. My goal was to create a user-friendly experience while also introducing new navigation techniques to enhance usability.

A. Login Screen

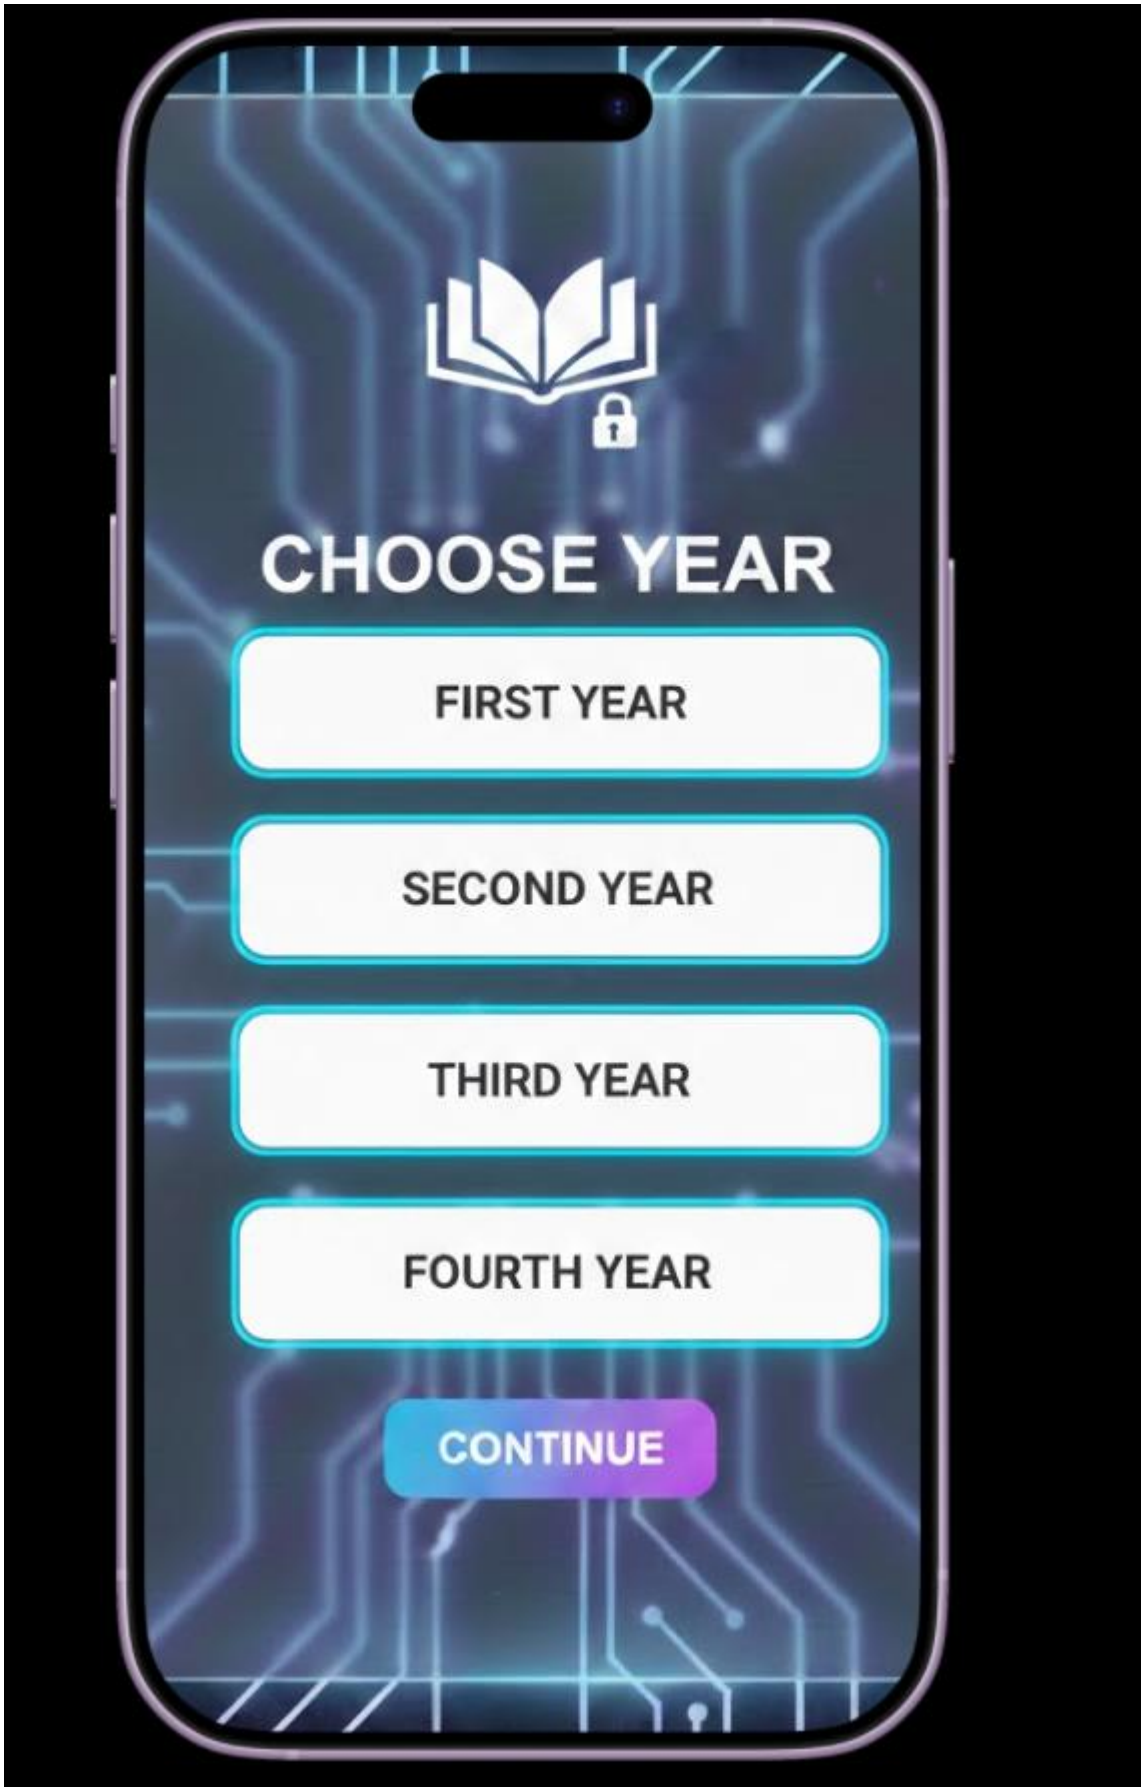
The Login Screen allows users to securely access the application by entering their authentication credentials. This screen contains input fields for Username and Password, which are familiar navigation elements commonly used in most applications. A “Continue” button is provided below the input fields to proceed after entering valid login details. Additionally, social login options such as Facebook and Apple icons are included to provide alternative and convenient login methods. The visual design uses a digital circuit-themed background and a book logo with a lock symbol to represent secure academic content access.



B. Year Selection Screen

The Year Selection Screen allows users to select their current academic year. This screen contains clearly labeled buttons such as First Year, Second Year, Third Year, and Fourth Year, making it easy for users to choose the appropriate category. These options help organize content based on the user's academic level. A "Continue" button is provided at the

bottom to confirm the selection and proceed to the next stage. This screen improves usability by grouping academic content logically and reducing navigation complexity.



CHOOSE YEAR
FIRST YEAR
SECOND YEAR
THIRD YEAR
FOURTH YEAR
CONTINUE

C. Download Notes Screen

The Download Notes Screen provides users with access to academic materials based on their selected year. This screen displays multiple download options such as Subject A Notes, Subject B Notes, Subject C Notes, and Past Papers. Each option includes a download icon, which is a familiar visual indicator that allows users to quickly recognize and download files. The layout is simple and organized to improve accessibility and usability. A “Continue” button is included to allow users to proceed after selecting or downloading the required notes.

SUBJECT A NOTES
SUBJECT B NOTES
SUBJECT C NOTES
PAST PAPERS
CONTINUE

D. Download Success Screen (Feedback Screen)

The Download Success Screen provides feedback to the user after successfully downloading the selected notes. This screen displays a confirmation message along with a visual success indicator (checkmark icon), which helps users understand that the download process is complete. The message confirms that the notes have been saved to the user's device. A "Back to Home" button is provided to allow users to return to the main screen and continue using the application. This feedback screen improves user experience by providing clear confirmation and navigation guidance.
